

# Nautiraid NRX 190, NRX 250 and NRX 300

**Nautiraid folding boats are ideal for fishing, hunting, day trips or use as a tender, and form a really practical, safe and easy to transport alternative.**

Thanks to the use of new materials, the folding boat concept is more than ever the most practical solution for those who want to combine ease of transport and stowage with safety and aesthetic qualities.

#### **Why choose a Nautiraid boat/tender?**

Light and of limited dimensions, (see specifications overleaf), Nautiraid boats/tenders are distinguished by their simply assembly and dismantling (2 minutes), with no tools.

These very easily maintained models should be rinsed with fresh water and are very tough. The quality of the materials used means the boats are very abrasion and tear-resistant, whilst remaining light to handle and transport.

#### **Specifications:**

Built in ash and birch plywood, combined with a textile sheath in Hypalon-coated polyester fabric; the NRX 190, NRX 250 and NRX 300 models open and fold like a fan, from a joint fixed to the front of the bow.

A framework, consisting of a keel, three or four stretchers and two ash planks, stretches a Hypalon-coated fabric.

On the outside, two closed-cell foam floats attach to the sides of the boat with self-fixing tapes. They act as fenders, whilst ensuring that the boat is completely unsinkable and perfectly stable.

Two varnished wood oars and a stowage bag for the accessories are delivered as standard.

Traditional  
manufacture

## Model NRX 190

- 1 longitudinal seat
- 1 transom capable of taking a 2 hp (max) outboard motor
- 1 central frame
- 2 floor elements
- 1 folding hull in hypalon

## Model NRX 250

- 2 seats or 1 longitudinal seat
- 1 transom capable of taking a 3 hp (max) outboard motor
- 2 frames
- 3 floor elements
- 1 folding hull in hypalon

## Model NRX 300

- 3 seats
- 1 transom capable of taking a 3 hp (max) outboard motor
- 2 frames
- 5 floor elements
- 1 folding hull in hypalon

## Dimensions

### Hull folded

	Length	Beam	Weight
<b>NRX 190</b>	1,90 m	0,20 m	11 kg
<b>NRX 250</b>	2,50 m	0,20 m	13 kg
<b>NRX 300</b>	3,00 m	0,20 m	19 kg

### Hull assembled

	Length	Beam	Depth	Weight	Charge advised
<b>NRX 190</b>	1,90 m	1,15 m	0,44 m	19 kg	180 kg
<b>NRX 250</b>	2,50 m	1,15 m	0,44 m	26 kg	220 kg
<b>NRX 300</b>	3,00 m	1,30 m	0,44 m	38 kg	250 kg

### Bag

	Length	Beam	Weight
<b>NRX 190</b>	1,05 m	0,50 m	8 kg
<b>NRX 250</b>	1,05 m	0,50 m	13 kg
<b>NRX 300</b>	1,05 m	0,50 m	19 kg
